

## REMARKS

The foregoing claims parallel the corresponding nucleic acid claims allowed in parent application Serial No. 08/569,749 (see allowed claims 33-36, 39-40, 42-48). Accordingly, these pending claims avoid subject matter disclosed in US Patent No. 5,919,912 and subject matter which may be claimed in one or more copending applications that resulted in temporary suspension of the parent application. These amendments introduce no new matter.

Respectfully submitted,  
SCIENCE & TECHNOLOGY LAW GROUP

Richard Aron Osman, Ph.D., Reg. No. 36,627
